
The University of British Columbia (*Bachelor of Science in Computer Science*) **Expected Graduation Year: 2026**
Relevant Courses: Relational Databases, Software Construction, Computer Systems, Algorithms & Data Structures
PROJECTS

Constructify (W.I.P)

- Developed a home-building platform using Vue.js and Vite for fast, responsive frontend development.
- Designed an intuitive UI/UX guiding users through planning, budgeting, and project management.
- Created detailed cost breakdowns and structured workflows to enhance transparency.
- Integrated project tracking for real-time updates and accountability.
- Collaborated with vetted service providers for competitive pricing and reliability.
- Implemented efficient dispute resolution mechanisms for smooth user interactions.

Amazon Marketplace Analytic Software

- Engineered an Amazon Marketplace tool, enhancing seller operational efficiency by 35%.
- Implemented an algorithm predicting ASIN trends, leading to a 50% reduction in overstock.
- Enabled multi-format data integration, including SQL and JSON, improving data retrieval times by 40%.

High-Performance Media Distribution Platform

- Orchestrated Ombi-integrated media server, automating 1,000+ weekly downloads with advanced scripting.
- Leveraged DHT protocols to index 10,000+ peer-to-peer assets, facilitating Radarr and Sonarr.
- Administered NGINX server, streaming a 50 TB Blu-ray archive to 150+ users.
- Engineered multi-user profile management for 200+ accounts, ensuring engagement and reliability.
- Enhanced system resilience with SSH-powered Raspberry Pi commands, reducing downtime by 90%..

WORK EXPERIENCE

Faaz Consulting (Prime Contractor for IBM)

May 2023 – Sept. 2023

Software Engineer (Contractor)

Maryland, USA

- Contributed to the agile development of an IBM application, reliably meeting deadlines and client specifications.
- Enhanced application features, focusing on user interface improvements and high-quality code standards.
- Collaborated with DevOps and QA teams to refine the deployment process, achieving a 20% uptick in efficiency.
- Expanded technical proficiency in Java, Python, JavaScript, SQL, and Swift, and utilized Git and JUnit to ensure robust code quality.
- Assisted in streamlining development workflows, incorporating automated testing, which resulted in a 30% reduction in bugs and improved productivity.
